Chemistry and Physics of Lipids, 64 (1993) 293
Elsevier Scientific Publishers Ireland Ltd.

Contents

Volume 64 (1993)

Y. Barenholz (Jerusalem, Israel) (Preface) 1
M. Grit and D.J.A. Crommelin (The Netherlands), *Chemical stability of liposomes: implications for their physical stability* 3
J.K. Lang and C. Vigo-Pelfrey (San Francisco, CA), *Quality control of liposomal lipids with special emphasis on peroxidation of phospholipids and cholesterol* 19
R. Gorodetsky, S. Amselem and Y. Barenholz (Jerusalem, Israel), *Trace element analysis of liposomal formulations by diagnostic X-ray fluorescence spectrometry (DXS)* (Short Communication) 31
M. Winterhalter and D.D. Lasic (Pessac, France; Menlo Park, CA), *Liposome stability and formation: experimental parameters and theories on the size distribution* 35
N. Ostrowsky (Nice, France), *Liposome size measurements by photon correlation spectroscopy* 45
S. Lesieur, C. Grabielle-Madelmont, M. Paternostre and M. Ollivon (Châtenay-Malabry, France), *Study of size distribution and stability of liposomes by high performance gel exclusion chromatography* 57
J.A. Bouwstra, G.S. Gooris, W. Bras and H. Talsma (Leiden and Utrecht, The Netherlands; Warrington, UK), *Small angle X-ray scattering: possibilities and limitations in characterization of vesicles* 83
B.R. Lentz (Chapel Hill, NC), *Use of fluorescent probes to monitor molecular order and motions within liposome bilayers* 99
V. Borenstain and Y. Barenholz (Jerusalem, Israel), *Characterization of liposomes and other lipid assemblies by multiprobe fluorescence polarization* 117
R.L. Biltonen and D. Lichtenberg (Charlottesville, VA; Tel Aviv, Israel), *The use of differential scanning calorimetry as a tool to characterize liposome preparations* 128
D.B. Fenske (Vancouver, BC, Canada), *Structural and motional properties of vesicles as revealed by nuclear magnetic resonance* (Review Article) 143
G. Cevc (München, Germany), *Electrostatic characterization of liposomes* 163
J. de Gier (Utrecht, The Netherlands), *Osmotic behaviour and permeability properties of liposomes* 187
W.R. Perkins, S.R. Minchey, P.L. Ahl and A.S. Janoff (Princeton, NJ), *The determination of liposome captured volume* 197
S. Amselem, R. Cohen and Y. Barenholz (Jerusalem, Israel), *In vitro tests to predict in vivo performance of liposomal dosage forms* 219
N.M. Wassef and C.R. Alving (Washington, DC), *Complement-dependent phagocytosis of liposomes* .. 239
M.C. Woodle (Menlo Park, CA), *Surface-modified liposomes: assessment and characterization for increased stability and prolonged blood circulation* 249
M.J. Parnham and H. Wetzig (Frankfurt am Main, Bonn and Wuppertal, Germany), *Toxicity screening of liposomes* 263
A.D. Bangham (Cambridge, UK), *Liposomes: the Babraham connection* 275
